Health Professionals – General Education for Transfer

Begin your degree at MECC
Students pursuing degrees in Cardiovascular Technology, Dental Hygiene, Pre-Pharmacy, Radiography, Cardiopulmonary Science Concentrations, or Surgical Technology can obtain general education credit for these programs at Mountain Empire Community College and then transfer these credits to other colleges in the region that offer degrees in these programs.

College/University Transfer Option
The Associate of Arts & Sciences degree programs of study at MECC are designed for students who plan to transfer to a four-year college or university to complete a baccalaureate degree, usually the Bachelor of Arts or the Bachelor of Science Degree.
When you enroll at MECC in the College Transfer program, you will be assigned a faculty advisor. You are urged to acquaint yourself with the most current requirements of the major department at the college or university you plan to transfer to following your study at MECC. It is important that you work closely with your MECC faculty advisor or transfer counselor in planning your program.

Important Facts to Remember:
• Requirements at the following colleges/universities are subject to change annually. Please make sure you have the most current information.
• The following programs have a selective admission process and are highly competitive.
• These MECC general education courses transfer into the following programs either as prerequisites to the program or as required courses within the program.
• Please note that MECC does not offer program courses for these degrees. Students can obtain the following general education courses and then transfer to the college or university offering his/her program.
• Please schedule an appointment with your advisor or the transfer counselor as soon as possible to make sure you are enrolled in the appropriate courses.
• Please check with your advisor regarding the scheduling of classes as certain courses are offered during certain semesters only.
